With the manual set to show the keyboard commands and display, I tried several patterns/lessons. I was pleasantly surprised how the manual helps you understand the synthesis process. Even though I am used to composing music by ear, I really enjoyed how easy FL Studio made the new process. I'm planning on building a custom PC using the SHS-500 next, and I may decide to add the BR70RE instead. This is by far the best way of making the transition to the PSR E-series (over the mono version). I am very happy to have received it for Christmas (January 2018) as it has come at the perfect time to use it. The funds were raised on Kickstarter and the project got funded within an hour of the campaign and the money was raised in less than 10 hours. I am pleased with the results and I am eagerly waiting for the PSR-E40 to be delivered to me at some point in April. The manual looks a bit like the guide in the box. The manual has pictures of the SWLL in both "mode" (out of the box) and in "parametric mode." It looks like there is more functionality in the parametric mode but I have not figured out how to get there yet. The BR70RE is very much like the BR60RE manual. As an avid user of the BR60RE manual, it has a similar cover with the manual. All of the pictures with the manual are black and white and look very detailed. Also, just like the BR60RE manual, it contains pictures of the SWLL in synth mode. Unlike the BR60, the BR70RE manual is in color and has a written guide for the specific model. It just strikes you at first glance that the manual will probably be more useful than the manual for the BR60 manual. The manual covers the PSS-A50 nicely and there is a good picture of the SWLL in the demo lesson. Both manuals are well done and look great. Sound is really nice with this synth and I think it will be an excellent addition to my PSR-E40 in the future. The new PSS-A50 manual is now available. Thanks to all who submitted a review.
